1.0 | SECURITY AND DATA RETENTION

1. All user details captured by ReAmped Energy are stored securely at all times and will never be provided to any unauthorised third parties. All credit card details are protected using SSL (Secure Socket Layer) encryption. Credit card details are handled by leading PCI compliant provider, Bambora, of secure credit card processing solutions. ReAmped Energy will never save your actual credit card details. We will simply save a reference to your card, which is called a token. This token is provided to us by the payment provider. Saving the token means that for future credit card transactions we can give you the option to charge the same card you used previously without having to re-enter the card details

2. The transmission of information via the internet is not completely secure. Although we will take reasonable steps to protect your information and make sure it is safe and secure and we use a number of physical, administrative, personnel and technical measures to protect your personal information, we cannot guarantee the security of your data transmitted to the Website; any transmission is at your own risk. For the avoidance of doubt, ReAmped Energy will not in any circumstances be liable to you, or third parties, for loss or damage arising from credit card fraud or identity theft
